

What is claimed is:

1. A polyamide resin composition for part of engine cooling water system, comprising 100 parts by weight of a polyamide resin comprising (A) from 50 to 98 % by weight of nylon 66, (B) from 1 to 30 % by weight of an aromatic polyamide resin, and (C) from 1 to 20 % by weight of nylon 12; and (D) from 5 to 150 parts by weight of an inorganic filler, with the total content of nylon 66, the aromatic polyamide resin and nylon 12 being 100 % by weight.

2. The polyamide resin composition for part of engine cooling water system according to claim 1, wherein the aromatic polyamide resin (B) comprises from 40 to 95 % by mole of a terephthalic acid component unit and from 5 to 60 % by mole of an isophthalic acid component unit and an aliphatic diamine, with the total content of the terephthalic acid component unit and the isophthalic acid component unit being 100 % by mole.

3. The polyamide resin composition for part of engine cooling water system according to claim 1, wherein the aromatic polyamide resin (B) comprises from 99 to 60 % by weight of a polyamide forming component comprising an aliphatic diamine and isophthalic acid and terephthalic acid and from 1 to 40 % by weight of an aliphatic polyamide component, with the total content of the polyamide forming component and the aliphatic polyamide component being 100 % by weight.

4. The polyamide resin composition for part of engine cooling water system according to claim 1, wherein the inorganic filler (D) is glass fibers.

5. The polyamide resin composition for part of engine cooling water system according to claim 1, wherein the engine is an automobile engine.

6. A part of engine cooling water system comprising the polyamide resin composition according to claim 1.
